## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121
  - I. Claims 1-6 are drawn to a surgical simulator, classified in (434/262).
  - II. Claims 7-9 are drawn to a plurality of polygons combined to form a computerized model of a heart, classified in (345/418).
  - III. Claims 10-15 are drawn to a method of designing a medical instrument by creating a computer model of a surgical instrument, classified in (703/1).

The inventions are distinct from each other because Inventions I-III are prima facie independent and distinct inventions due to their recitations of distinct and specific structures. Invention I is directed to a surgical simulator. Invention II is directed to displaying a plurality of polygons combined to form a computerized model of a heart. Invention III is directed to a method of designing a medical instrument by creating a computer model of a surgical instrument. Because these inventions are distinct for the reasons given above, and has acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
